Dear Sir/Madam

Additional information - Hybrid planning application for the development of land at princes parade:

An application for outline planning permission (with all matters reserved) for up to 150 residential dwellings (use class c3), up to 1,270sqm of commercial uses including hotel use (use class c1), retail uses (use class a1) and / or restaurant/cafe uses (use class a3); hard and soft landscaped open spaces, including children's play facilities, surface parking for vehicles and bicycles, alterations to existing vehicular and pedestrian access and highway layout within and around the site, site levelling and groundworks, and all necessary supporting infrastructure and services.

Full application comprising a 2,961sqm leisure centre (use class d2), including associated parking, open spaces and children's play facility

Princes Parade Promenade, Princes Parade, Hythe, Kent

Thank you for consulting us on the above. We have the following comments to make following provision of the additional information.

We have reviewed the additional information provided and are satisfied with our original response, however we recognise from the information provided that in certain locations a 25m buffer zone is unattainable, although 20m can be achieved. As such we would recommend a change of wording to our original buffer zone condition as follows:

Condition: No development shall take place until a scheme for the provision and management of a buffer zone of at least 25m wide, where achievable, alongside the Royal Military Canal has been submitted to and agreed in writing by the local planning authority. Thereafter the development shall be carried out in accordance with the approved scheme and any subsequent amendments shall be agreed in writing with the local planning authority. The buffer zone scheme shall be free from built development including lighting, domestic gardens and formal landscaping; and could form a vital part of green infrastructure provision. The schemes shall include:

- plans showing the extent and layout of the buffer zone, including details of where a reduced width of 20m is only achievable.
- details of any proposed planting scheme of native species.
